

clariti™

Clariti lenses ensure a wetter and smoother lens surface for improved **comfort** throughout the day.

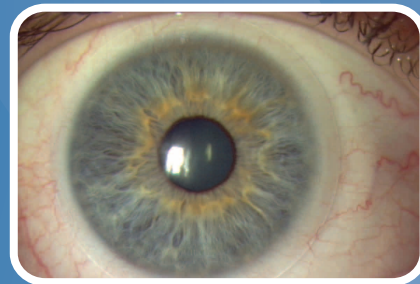

More Oxygen for healthier, whiter eyes

Clariti lenses are made from an advanced contact lens material which allows more oxygen through to the eye promoting healthier, whiter eyes.

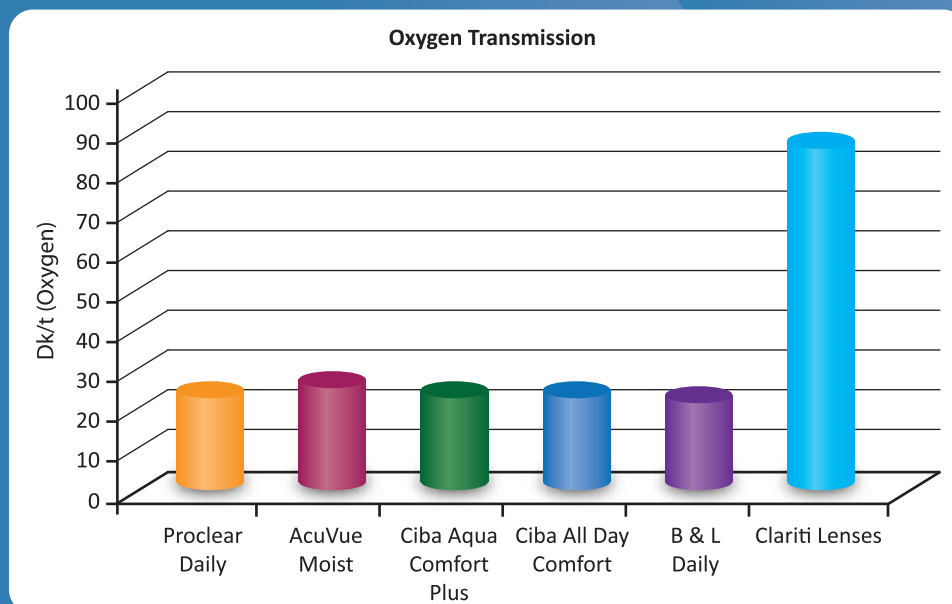

Clariti lens*

Standard Hydrogel lens*

This is because Clariti lenses allow more than three times the amount of oxygen to the cornea than standard lenses.

* Each contact lens was worn in the same eye for the same length of time, pictures were taken after 2 days wear.
